As a result of healthy growth in our business we wish to strengthen our team in Wiesbaden and are searching for a candidate to fill the roll of:

## **Consultant (m/f)**

### **for the Rail Transport Sector (Operations/Infrastructure)**

Railistics GmbH is a successful, well-established in the market, internationally operating consultancy and engineering company that specialises in the railway sector. Our clients include public institutions at home and abroad as well as railway companies, logistics operators, banks and industrial companies.

**Your tasks:** You will find yourself as part of a team from various backgrounds working to serve our customer's needs. This work can include carrying out feasibility studies and business plans in terms of benchmarking and restructuring of railways. This work can also include projects on rail safety and law as well as rail operations and the organisation of rail companies.

**Your profile:** Ideally you will have completed a degree in Railway Engineering and have previous professional experience in this field. You will have a good command of the English language (written and spoken) and a willingness to travel inland and abroad. You will have competence with the relevant computer software, good communication skills and report writing abilities. You will be comfortable working alone or within teams with the ability to quickly understand new and complex tasks. Intercultural experience will be a benefit as you will be expected to interact with clients and project partners from different cultural backgrounds.

**What we offer:** We offer the chance to work on wide ranging and varied projects as part of a motivated team with the opportunity for further training and the potential for further development. Flexible working times are also possible if necessary.

If we have piqued your interest then please submit your application to:
